WHOWEARE

AMSA is multinational manufacturing service with headquartes in **Italy, Spain & Pakistan**. We produce technical and sporting clothing and accessories for third parts or on the market. Our mission is to deliver a full, flexible and custom oriented service through various collaborative solutions. We also offer availability to brand management under licence. Renowed sporting brands of cycling and motorcycling entrust us their racing, turing and sportswear productions.

4 REASONS **TO WORK WITH US**

1 MANUFACTURING SERVICE

AMSA's service ranges in the mass-production of models and samples. Our Stylab Office, when required, researches the resources on the market and takes on the task of supervising each of the assembling steps of the manufacture and quality checks. If requested we pack and delivery the products to their final destinations ready to be sold.

2 MANAGEMENT AND DELEGATION OF THE WORK

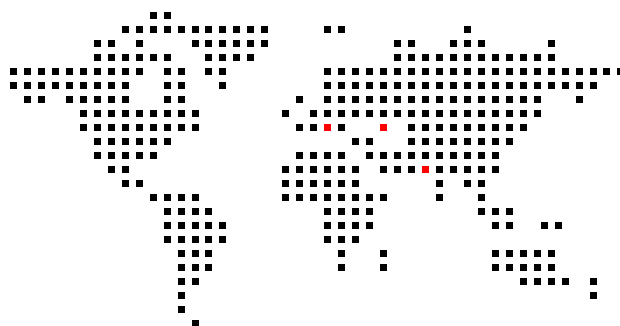

Each factory is engaged in different types of products and steps in the manufacturing process. This allows highly specialized synergies and contemporarily reduces the costs of production. In just about 15 years AMSA has successfully gained the trust of many important companies on the EU market.

3 COMPETITIVE MANUFACTURING REALITY

AMSA is a competitive manufacturing reality where the price/quality ratio is one of our main strengths, and pride ourselves on a solid experience and vanguard know-how in the production of technical clothing for dynamic activities. AMSA's manufacturing service also has a section dedicated to the creation of tailored knitwear and even a fashion line in constant evolution for the production of motorcycling footwear.

4 HEADQUARTERS IN ITALY, SPAIN & PAKISTAN

Additional strength points of ours are the professionalism of our skilled workers, the provision of resources and, last but not least, the division of our manufactures in the various AMSA

Innovation experience

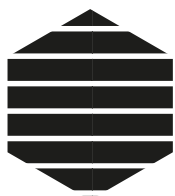

MATERIALS

600D/800D HIGH DENSITY POLYESTER

Material composed of polyester thread with a high density fabric that increases protection and resistance to abrasion. Perfect fitting to the body and waterproof properties.

POLYESTER STRETCH

Elastic material made of polyester thread. It is placed in areas with less risk of impact. Fabric adaptable and adjustable to the body.

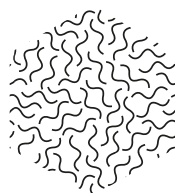

3D MESH STRETCH POLYESTER

Breathable and ventilated material with 3D mesh scheme. This fabric is composed of tens of thousands of polymer synthetic fiber threads, capable of withstanding high levels of traction. Soft and comfortable fabric.

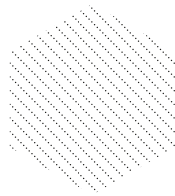

NATURAL LEATHER

Natural fabric composed by cow and lamb tanned hides. It is resistant to abrasion and is one of the most durable materials. Summer garments also add micro-perforated leather for greater transpiration.

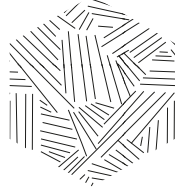

SYNTHETIC LEATHER

Synthetic fabric that imitates the aesthetics of turned leather or natural suede. A breathable, washable alternative, with highly resistant to abrasion and lighter than natural leather.

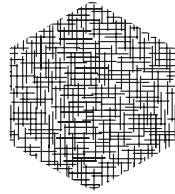

LYCRA

Lycra is often part of many garments in combination with other materials. Also known as elastane or spandex, is a synthetic fiber with high elasticity and strength. It bears sweat and fits perfectly to the body.

POLYESTER INNER LINING

Polyester fabric, breathable and very light. Includes polyurethane coating to preserve the body temperature of the rider.

POLARTERM

Thermal fabric that guarantees exceptional warmth in the most adverse climatic situations, being lightweight, breathable and durable.

TECHNICAL FEATURES

SNL-021874

The female version of AMSA GARAGE EVO has all the characteristics of style, taste and refinement, including the novelties of the EVO version mentioned in the male version. The peculiarity of this variant is that it has a specially redesigned design to give maximum expression to femininity, both in the saddle and during everyday life. The external and internal elastic zones at the hips ensure a better fit. Equally impeccable is the ability to adapt to different seasons and the degree of safety offered by the approved protections. The ideal mix for a jacket with a cafe racer style, capable of expressing the exuberant class of an independent character.

- Soft and matte skin • EPI jacket with CE approval • Full detachable winter lining • Elbow and shoulder protectors with detachable CE approval • Back pocket that can accommodate a CE back protector • Classic collar with leather comfort reinforcement, snap button closure • Zip pullers and press studs in aged effect metal • Cuffs with zip and flap with Velcro • Closure with buckle and velcro • Sporty and tight fit • Wind flap under the central zip • Jacket / trousers connection: half zip • 2 zip hand pockets / 2 pockets in the winter lining / 1 zip pocket for the wallet / 2 inside pockets

BAMJ007 BLACK

TECHNICAL FEATURES

BAMJ007 ROCKET MAN was developed by AMSA to be a concentrate of engineering - a modern motorcycle jacket with prEN 17092-2: 2017 Class A certification. To ensure total versatility, it boasts a removable thermal liner and a ROCKET membrane that makes it waterproof, windproof and breathable. The main structure of the jacket is in technical fabric with ventilation zip on the chest and adjustment straps on the sides, chest and arms to guarantee a tailored fit. To increase the level of protection, there is a connecting zip between jacket and pants, removable SMOOTH WAYS protectors certified EN1621-1: 2012 on the shoulders and elbows and a pocket for the level 1 or level 2 Warrior back protectors. There is also an external waterproof pocket for valuables and reflective areas to improve night visibility.

- Jacket Certified prEN 17092-2:2020
- waterproof multilayer technical jacket.
- The 3 independent layers and the front and rear Gradual-Air panel
- Removable lining with waterproof membrane.
- Modular in size, ensure optimal performance in all weather conditions.
- Velcro® closure side waist adjusters.
- Removable CE- approved protectors.
- Outer layer from abrasion resistant Maxdura.
- Zipper for pants connection.
- Reflective sticker for added night time safety.

BLUE

The new **AMSA Pro Future motorcycle jeans** are fully prEN17092-3: 2017 Class A certified and have been specially developed to offer excellent performance on the bike, without sacrificing comfort. Made from a 13 oz Cotton / Cordura® mix, they are resistant to abrasion and perforation. There are flexible panels on both knees to offer an optimal fit throughout the day, and they boast a slim fit cut to ensure the most modern look. Furious Pro are equipped with Warrior Lite protectors on the knees and hips, certified for En 1621-1: 2012 Lev.1 and the knee protectors are adjustable to allow each rider to position them correctly. The inner thigh area is made of a flexible material and finally there are three front pockets and two rear pockets with internal anti-slip barrier.

TECHNICAL FEATURES

- Pleasant to the touch, the durable cotton denim and double stitching ensure long life and extended use
- The "friction zones" reinforced with kevlar fibers significantly increase the abrasion resistance
- An additional layer of material covering the reinforced parts of the pants prevents skin irritation
- Detachable and certified knee protectors with adjustable position and hip protectors protect against the effects of falls
- 4 pockets for Air Vent
- 5 pockets allow you to carry small basic things with you
- The reinforcement on the inside of the thighs increases the resistance of the pants, preventing the abrasions that often occur in this area
- Elastic panels over the knees and loins ensure comfort even on long rides
- A fitted and universal cut also makes the trousers an excellent style element of everyday wear
